Statement of purpose

I was born as a highly anticipated new material atKomatsu Matere. My strengths are stretchability and bounciness.

I have a new moist sensational touch almost like baby skin.

My goal is to meet many people around the world by turning into not only fashion wear but also furniture, car seats, shoes, bags, etc.

I hope people will be happy when they touch me, and the possibility of fabrics will expand as well.

New sensational suede
