

**Komatsu may become
a famous production area
of "KONBU".**

We want to deliver innovative fabrics that customers will be surprised at. "KONBU" is a unique fabric created from the playfulness of Komatsu Matere. However, the road to commercialization is a long way off, and it was born from a series of trial and error. Aside from the taste, the finished fabric is as good as the natural kelp. It is the highest quality standing fabric "KONBU" born in Komatsu.

Standing fabric

『KONBU』

Standing fabric "KONBU" with unique hardness that allows it to stand on its own. By swelling each fiber with our unique special processing technology, "KONBU" has a feeling of swelling and volume up, and has a dry and tight feeling (compact feeling) like kelp of marine products. Is the greatest feature, and the material hardness is the highest level among the fabrics we propose. The color development is extremely high, and you can enjoy the material even in color.

小松将成为 “KONBU”的著名产地。

想为顾客送上令人惊叹的创新材料那就是“KONBU”，它是小松美特料公司拥有的独特材料，诞生于匠人独具的玩心。不过距离实现产品化还有很长一段路，它也正是从不断的摸索和失败中产生的。风味暂且不说，做出来的成品质量并不亚于天然的海带。它就是小松美特料出品的最高等级材料立式织物（standing fabric）“KONBU”。

立式织物（standing fabric）

『KONBU』

立式织物“KONBU”具有可以自己撑起形状的独特硬度。采用独特的特殊加工，使纤维一根根溶胀起来，从而具有膨胀感，体积也增大了，这样的“KONBU”最大特点是具有海带一样的干燥感、紧凑感（紧密感），材料硬度在我公司提案设计的织物中也是最高等级的。而且显色性极高，色彩方面也值得期待。
